Subject: Microsoft Settlement

this settlement is very fair. the only people that seem to be complaining are microsofts competitors and people that think operating systems should be free and not be considered intelectual property. this company is one of the great success stories of the 20th century. don t punish them further for this success. nobody that i know complains about microsoft. they like their products and find them easy to use. stop wasting all this money on this court case. it s rediculous.
